

### **OQ PRODUCT HANDLING GUIDE**

## Di-n-Butylamine CAS # 111-92-2

Di-n-Butylamine is a colorless liquid with an ammonia-like odor. It is soluble in hydrocarbons, but insoluble in water. It is stable under recommended storage conditions, but will burn if heated or exposed to an ignition source Di-n-Butylamine is available from OQ in the following packages:

- UN 1A1/X1.2/300 55-Gallon Carbon Steel Drums
- DOT 111A100W1 Tank Cars
- DOT MC 307 or DOT 407 Tank Trucks

| Storage | Recommended Blanketing  | Dry Nitrogen <sup>1,2,3</sup>   |
|---------|-------------------------|---------------------------------|
|         | Recommended Temperature |                                 |
|         | Maximum                 | 100°F (37.8°C)                  |
|         | Minimum                 | 0°F (-17.8°C)                   |
|         | Recommended Pressure    | Atmospheric                     |
|         | Bulk Quantities         | Outside, detached tanks         |
|         | Small Containers        | Cool, dry, well ventilated area |
|         |                         |                                 |

### Handling

- Thoroughly review Safety Data Sheet before handling product.
  Keep containers closed when
- Open containers slowly to allow any excess pressure to vent.

not in use.

 Keep away from heat, sparks, flame, or other sources of ignition.

See the National Fire Protection Agency (NFPA) #30 "Flammable and Combustible Liquids Code" and consult with qualified fire protection specialists to determine specific storage tank design requirements. Refer to the OQ Safety Data Sheet for more specific health and environmental

- Protect small containers from physical damage.
- Use proper electrical grounding and bonding procedures when loading, unloading, and transferring.<sup>1</sup>
- Refer to the OQ Safety Data Sheet for more information on materials to avoid.

information and refer to the OQ Product Descriptions for additional physical properties and general product information. Safety Data Sheet and Product Descriptions for Di-n-Butylamine are available through your OQ sales representative.

- Use spark-resistant tools.
- Electrical equipment and circuits in all storage and handling areas must conform to requirements of national electrical code (Articles 500 and 501) for hazardous location.
- 1. Refer to NFPA #77 "Static Electricity" for proper electrical grounding procedures.
- See the National Fire Protection Agency (NFPA) #30 "Flammable and Combustible Liquids Code" and consult with qualified fire protection specialists to determine specific storage tank design requirements.
- Nitrogen blanketing should be used to retain quality. A white precipitate can form when product is exposed to air
